

# WHEEL LOAD ( 40000 LBS MAX ) DUCTILE IRON TYPE

Note: The wheel loads below are not adjusted for duty cycles. That means that the wheel load service coefficient "Kwl" can be applied to the actual maximum wheel load of the crane, based on duty cycle. The resulting equivalent wheel load "Pe" may allow the use of smaller End Trucks and rails.

WHEEL LOAD ( 35500 LBS MAX ) **BRONZE TYPE**

Note: The wheel loads below are not adjusted for duty cycles. That means that the wheel load service coefficient "Kwl" can be applied to the actual maximum wheel load of the crane, based on duty cycle. The resulting equivalent wheel load "Pe" may allow the use of smaller End Trucks and rails.
